Dear Educator

South African high schools are invited to participate in the South African Model United Nations for 2017.

The South African Model United Nations actively uplifts and unites South Africans through education, by bringing together resourced and under-resourced South African learners. Through a simulation of the General Assembly, the project teaches tolerance and peace and furthers the values and principles of the United Nations, including human dignity, equality and equity. It also equips our learners with the skills they need to participate effectively and confidently globally.

Workshops are held in each province during May to prepare teams for the conferences that will take place in the provinces during August. For further information, please visit www.samun.org.za

Should your school wish to participate in this exciting world of Model UN debating, please read the attached criteria for participation thoroughly and then complete the registration form, faxing it to Education Africa on 011 783 1714 or sending by email to bongi@educationafrica.org

Yours in debating

Bongi Mathebula
